INTRO:

The objective of bringing this panel together is to learn about the leadership process in Quota; the personal journey of our past leaders; to share candid challenges and organizational benefits; and to look at how we can work together to encourage more members to move up the Quota leadership ladder.

Our District is experiencing a lack of desire of members to move forward even at the club level. Leadership roles are not been actively sought in our District and we need to promote the “election” of new leaders at club level and beyond. Also, I believe, the experience and corporate knowledge of our past leaders is not been used to our best advantage.

The Magic of Mentoring begins with Tradition. Without it, our Quota family will not flourish. We must pass along the challenges as well as the rewards of becoming a Quota leader.

The panel will be asked to present a short biography and to express opinions on the following questions: Each member of the panel will have approximately 5 minutes to speak:

Dates of tenure(s)

Did you choose to move directly into the next level of leadership or did you take a break? Why?

What factors did you take into consideration when you made the decision, i.e. career-wise, financially, etc?

How would you improve the grooming of new leaders in Quota?

Quota Training participants will then have time for Questions and Answers
